ANTA CRUZ SET FOR BIG POULTRY SHOW IN OCTOBER

California's first annual educational aby chick, egg and statewide poultry ow, under the auspices of the Cali-rnia Poultry Council, will open at anta Cruz October 5 for six days. ntries for the exhibits will close on eptember 25.

There is every indication that this ow will be largely attended. It will e featured by a four-day poultry con-ress.

Leslie Cranbourne is general man-ger of the show and E. M. Eissele eneral superintendent.

NEW STATION FOR REDWOOD

Not far from the city water works on the marsh east of Redwood City a P. G. and E. construction crew is erecting a new electrical substation to take the place of the small substation now operated in that city. Rapidly increasing demands for power have made a larger substation necessary. The new station will cost $182,000. When it is completed and equipped the high voltage lines will be removed from the residence and business sections, and the electric tower near Main and Broadway will be taken down.

DALY CITY, COLMA PROUD, RIGHT TO BE, WHY? EL CARMELO PARLOR WON FIRST PLACE AT SACRAMENTO DRILL

It is a foregone conclusion that the people of Daly City and Colma have something to be proud of, to put their thumbs in the arm holes of their vests and puff up like a puffed pigeon; proud of the efforts they have made in assisting the drill team of the El Carmelo Parlor, N. D. G. W. towards the purchase of the uniforms in which to appear before the multitude of people gathered at the Sacramento State Fair on Admission day in this glorious year of 1926; and proud of the young ladies who were so diligent in the practice which made them perfect in the exhibition drill which they put on at the State Fair grounds on this date. Proud to know that it was up to Daly City and Colma to produce the necessary girls with ambition enough to put forth their efforts with the avowed determination to win—and WIN they did. In the winning the advertising they secured for this community has more than paid for the uniforms, the effort and the sticktoitiveness. If everyone in the community had the same spirit these young ladies have—gosh, what a community it would be!

The Drill Team of El Carmelo Parlor, No. 181, Native Daughters of the Golden West, received first honors, a handsome silver trophy, in a statewide competition drill; held at the Sacramento State Fair Grounds in the afternoon of September 9. These girls, with the assistance of the parlor and the people of Daly City and Colma have worked for the past year to raise money to purchase the beautiful new uniforms which they wore for the first time in Sacramento in the Admission Day Parade. The snappy military uniforms which consist of white trousers, a red coat with white Sam Brown belt and white West Point hat, caused much cheering along the line of march and the Sacramento papers were loud in their praise. Last year during the jubilee celebration in San Francisco the girls drilled in public for the first time, and did remarkably well; but were discredited because they did not have uniforms. This year they more than justified the confidence placed in them by the people of the community, by their wonderful performance in Sacramento. They plan to give a dance in the near future and will present their famous drill. The following girls compose the team; which is commanded by Major Laura Figone: Ruby O'Connor, Sylvia Fischer, Margaret Varni, Dolores Barron, Lorraine Wall, Annette Lucey, Freda Christen, Elsie Fahey, Cellista Dalton, Louise Gregoire, Florence McKendrick, Tessie O'Connor, Grace Johnston, Esther Forsell, Edna Stewart, Christine Hume, and Caroline Spani.

Great Credit also should be given Otto Schramn and W. Ottoboni for their untiring efforts during the past year in bringing the El Carmelo Parlor Drill Team to such a high standard of perfection.

The following is a clipping from the Sacramento Bee, the evening paper:

> "Led by Marshal Joseph M. Golden and his aides, Thomas Dillon and George W. Schonfeld, the fourth division marched on with the men's and women's drill team featuring. While Stephan's Sacramento band was playing; the natty women's drill team of the El Carmelo Parlor of Native Daughters of the Golden West, made one of the big hits of the parade. Clad in a very becoming uniform of red and white, these beautiful daughters of California won the hearts of the crowd. There were several other Native Daughter drill teams from San Francisco in this division."

COLUMBUS DAY FETE OCTOBER 17TH

Sunday, October 17, has been set by the Columbus day committee as the day for San Francisco's official celebration of the landing of Columbus in America.

The day was chosen in order not to conflict with previously arranged celebrations of the founding of Mission Dolores, which will occupy the preceding Sunday.

The program will include a pageant depicting the landing of the great explorer, aquatic sparts, daylight fireworks and other festivities. It will be staged at Aquatic Park.

C. A. DIBBLE IS VERY APPRECIATIVE— KEEP UP GOOD WORK

I am deeply grateful to the voters of the first township for their efforts in my behalf at the primary election, and I desire to express my sincere appreciation for their support.

My standing at the conclusion of the primaries encourages me to believe that with your continued co-operation and untiring, faithful support at the general election November 2, I shall be successful in fulfilling my earnest wish to serve you in the capacity of constable of the first township.

C. A. DIBBLE.

ITY DADS HOLD INTERESTING MEET CONGRATULATES DRILL TEAM TAX NOT CHANGED; LOW AT $1.90

The Board of Trustees held its re-ular meeting last Monday evening in he City Hall. By resolution the tax ate for 1926 and 1927 remained at 1.90, the same as last year. The ghting committee recommended the stallation of three lights; one at lission Circle and Bepler, one on cton st, and one on Wellington pposite the City Hall.

The park committee, A. J. Bodien hairman, was instructed to post number of "NO Dumping" signs various parts of the city.

A permit for blasting on Lot11, lock 1 Hillcrest Tract was granted Jack Fahey. The request for a per-it was accompanied by a suitable ond to cover any possible damage the surrounding property.

Congratulations were sent by the oard to the Drill Team of the El armelo Parlor, No.181, Native aughters of the Golden West on heir winning of the state champion-hip for the best drilling held last hursday, at Sacramento. The Board xpressed the hope that the cup will emain in Daly City for many years.

The superintendent of streets ames Hawkins, was instructed to lace street signs at the corner of rankfort and Templeton Aves.

An application for a gasoline pump n the sidewalk of Templeton, be-ween Wellington and Mission, was eferred to the street committee.

Assistant City Engineer Klassen nd the street committee are invest-igating the matter of sewer rrangements for the National Dairy Co.in Colma.

SOUTH CITY MAN SAYS SELF-DEFENSE

Self-defense was the plea of Louis Shellman, South San Francisco, held for murder as a result of the death of Frank Elmer "Gene" McCaffrey of Stockton, son-in-law of the South Stockton, son-in-law of the South San Francisco man, it was indicated in a questioning of Shellman Wednesday at the county jail in Redwood City by District Attorney Franklin Swart. McCaffrey died after being stabbed with a butcher knife during a fight between the men at the Shellman home Tuesday night.

"I believe it was a plain case of self defense," said District Attorney Swart, following the questioning of Shellman and other witnesses, including Mrs. McCaffrey daughter of the household, who had returned to the home after separation from McCaffrey,.

McCaffrey died as assistance was being summoned. Shellman surrendered to Police Chief Louis Belloni of South San Francisco and was brought to the county jail, facing charges of murder.

Four small children of Mrs McCaffrey were in the house at the time, having been brought by their mother at the time of her separation from the dead man. The fight culminated a long series of alleged abuses of the daughter by McCaffrey members of the Shellman household said.

NEW EVENTS CONSTANTLY BEING ADDED TO M'LAREN FETE, ALL ARE BOOSTING FOR ITS SUCCESS

Backed by the double appeal of a popular cause and an attractive program, those in charge of McLaren Day to be held Sunday at Tanforan are counting upon a response that will fill the grand stand at the track.

The program will be headed by Jackie Coogan and his movie circus and races. There will be a long list of athletic and novelty events beginning at 1 p. m. Frank G. O'Kane is in charge of the day for the park commission headed by Herbert Fleishacker, and Norman Manning is director of events.

The finishing point of the 100-mile bicycle road race under the direction of the Unione Sportivi Italiana has been shifted from Golden Gate Park stadium to Tanforan race track in order to provide another outstanding feature for John McLaren Day.

Ernest Ohrt, director of the race and the club officials readily agreed to the change in order to further the success of McLaren Day, the proceeds of which will go to the fund for the building of a new lake in the park in honor of John McLaren.

Starting from San Jose at 9 o,clock in the morning, the racers will traverse highways and mountain road through Mayfield, La Honda, San Gregorio, Half Moon Bay, Rockaway, Salada and over the Skyline boulevard to the road leading down to Tanforan. Jackie Coogan will meet the winner.

While awaiting the marathon riders, two special bicycle races will be staged as part of the big McLaren day program at Tanforan Four girl riders, Irene and Dorothy Sands, Lucille Rhodes and Ivy Silver will stage a sprint race of two heats of three-quarters of a mile each. A French style three-cornered match race of three-quarters of a mile, will be pedeled by Steve O'Conor former State champion. So lets have a large representation from Daly City to swell the fund for Golden Gate Park Lake.

An old-time rodeo was added yesterday to the program for "John McLaren Day," to be staged at Tanforan racetrack Sunday.

Declaring that he and his "constituents" share the entire city's regard for John McLaren, Charlie Mitchell, "Mayor of Butchertown,' advised the committee in charge that his cohorts will add a generous act to assist the fund for creating a new lake in Golden Gate Park in honor of the veteran park superintendent.

The rodeo will be held in front of the grand stand. The troupe of cowboys gathered together by Mitchell for the event includes Ed. (Knucker") Sullivan, Al Shepherd, Roy Hanna, Johnny Kirk, Jack Mitchell, Eric Thyssen, Joe O'Day and J. Ford.

Jackie Coogan and his movie circus and races, will head the McLaren program, which will include the finish of a 100-mile cross-country bicycle race, athletic and novelty events and comedy numbers by Harry McKenie's clowns and A. Neri's troubadors.

Tickets for the benefit have been placed on sale at all Owl Drug Stores the Emporium, Sherman, Clay & Co., and the Palace Hotel headquarters.

HIT-AND-RUNNER HELD ON $3000 BAIL

Arthur T. Savage, charged with manslaughter and hit-and-run as the result of an accident last Saturday night in South San Francisco when Jack Salvato, 16-year-old boy was killed, and two others seriously injured appeared before Justice Edward Farrell of South San Francisco for preliminary hearing. Savage is at liberty on $3000 bail.

He is alleged to have crashed into the Salvato automobile, killing young Salvato and injuring the boy's father and then to have run away from the accident leaving his automobile at the scene.

Chief Louis Belloni of South San Francisco, with two San Francisco detectives, arrested Savage Sunday afternoon at his Geary st eet home. He was held in the county jail on the two charges until Monday when he furnished bail.

Two other passengers in the Savage automobile, Ed. Kibde and "Red" Stone both disappeared after the accident. Kibde later reported at the South San Francisco hospital with a broken rib and other injuries.

MARKET STREET RAILWAY SUED

Suit for $25,293.75 was filed against the Market St. Railway Monday by Mrs. Margaret McAvoy as the result of the death of her daughter, Estelle, in an automobile accident last September. According to the complaint filed by Atty. Joseph A. Garry, Miss McAvoy was riding with a William Graves, when their automobile was struck by a street car at Mission and Vista Grande av. Miss McAvoy died several days later from the effects of the accident.

SKIN ABSORBS ACID MRS. WULBERS DIES

Absorption of a searing acid through the skin contributed to the death of Mrs. Louise Wulbers of San Jose, who died last Thursday while undergoing a youth-restoring operation at 720 Powell street, according to the verdict of an inquest jury yesterday.

The jury recommended legislation against the future use of carbolic acid or its agencies in beauty treatments.

Dr Zalach Saltzman, Los Angelus physician, who was operating upon Mrs. Wulbers when she collapsed, was not a witness at the inquest. He is at present free on bail pending a hearing on a manslaughter charge in Police Judge Daniel S. O'Brien's court September 22.

Two factors were given by the jury as contributing to the 52-year old women's death. The first was excitement and shock caused by the treatment, and an important bearing in determining responsibility in view of the previous findings of Dr. Shelby P. Strange, autopsy surgeon that the woman had a bad heart.

WILLIAM PUCCINI DIES FROM FALL

William Puccini, a Colma ranch-er, died Monday from the effects of a fall suffered on the steps of his home Sunday.It was at first believed that Puccini, who was brought to St. Luke's Hospital late Sunday night by an unindentified man with a fractured skull, was the victim of a fight but it seems that Puccini who was subject to fits had another attack on Sunday and losing his balance fell on his head causing the fracture. The funeral was conducted by the Druid's of San Francisco, services were held at the W. C. Lasswell undertaking parlors, and burial took place in the Italian cemetery on Thursday, at 2 p. m.

RED MEN HAVE BIG DAY SUNDAY

The Red men couid'nt have picked a more ideal day than last Sunday for their excursion on the Bay Nine hundred people boarded one of the large Vallego boats at the Ferry and cruised around the Bay all day with a stop at Mare Island for 30 minutes. Among the many local people who enjoyed the trip were Mr. and Mrs John O'Connor Mr and Mrs. Bob Wall Mr and Mrs J. Varni Miss Margaret Varni, Mrs. H. O'Connor the Misses Margie and Jessie O' Connor Mr. Al. Kennedy and Miss Ester Forsell. Everyone enjoyed themselves to their hearts' content, dancing on board to the tune of a 5-piece orchestra.

HOW ABOUT THIS MUCH FOR THE KIDS?

Establishment of a $500,000,000 trust fund to be used in the prosecution of persons cruel to animals and for the protection of animals and game in all parts of the world is provided for in the will of Stacy Anson Ransom, scientist, who died August 26.

The fund would be accumulated from the investment of $400,000 which is provided in the will on file in probate court here. Half of the income would be used to protect animal and game and the remainder would be accumulated and invested until it reaches $500,000,000.

determine the nature of the malad that has caused the death of man sheep in the last few weeks.

Radio advertising of grapes grow in the El Camino district has create such a demand in Missouri, Iowa an Nebraska, that the owners of Statio KFNF have sent an urgent call t arrange for the shipment of two ca loads a week for the balance of th season. The fruit is sold right fro the car as soon as it arrives fro Cerber.

ASSERTED BIGCRAFT DID NOT PROVIDE FOR FAMILY—JAIL

Oliver M. Bigcraft, 40, a carpenter of Daly City, was taken into custody by Deputy Sheriff Peter Larrecou and lodged in the county jail on a charge of failure to provide for his family. He will be tried in the court of Justice of the Peace Ray Griffin.

NOT MUCH CHANGE IN UNOFFICIAN AND OFFICIAL COUNT

Few results were changed by the official canvass of votes cast at the recent primary, it was announced by J. Harry Zemansky, registrar of voters, upon completion of the formal count Tuesday.

The total vote was increased by the canvass from 115, the unofficial figure, to 117,292, and a gain in votes was shown for Judge Timothy I. Fitzpatrick which assured him of a place as a majority candidate at the coming election. The official count gave Fitzpatrick 58,745 votes. The unofficial count for him was about 500 less. Fitzpatrick's majority is 99 votes.

The official Republican vote for governor includes:

C. C. Young, 41,874; Friend W. Richardson, 32,713.

The Democratic gubernatorial vote was: Justus S. Wardell, 8,252; Cal Alex Johnson, 3,662.

For the Republican nomination for Senator, the official vote was Samuel M. Shortridge, 34,507; Walter F. Lineberger, 8,364.

Lineberger received 121 votes for the Democratic nomination for Senator.

SHERIFF M'GOVERN BACK ON JOB —HELLO "BRICK"

Sheriff T. C. McGovern was back at his office in Redwood City Monday and directed the work of his office for the first time since he was injured in an automobile accident about five weeks ago. The sheriff is almost fully recovered from the effects of the injuries he received at that time and carried on his work today with great enthusiasm.

BOY DROWNS LAST SATURDAY IN BAY BODY FOUND THURS.

No trace has been found of the body of Lloyd Glennon, 16 who drowned on Saturday off the foot of Oak Grove avenue, Burlingame, when the boat in which he and a companion were paddling toward Pacific City capsized. The companion, Julius Meghinasso, swam ashore and notified officers of the tragedy.

Searchers, led by Floyd Glennon, father of the dead youth, continue to seek the body, which is thought by officers to have been carried to some other section of the bay by the swift current of the main channel.

(LATER) The body of Lloyd Glennon, 16-year-old San Mateo boy, who was drowned last Saturday, while

CADDY AT SUNSET COUNTRY CLUB LOSES SIGHT IN EYE

A caddy at the Sunset Country Club was struck in the eye by a golf ball and he lost the sight of the eye. The verdict against the golfer was for $6,000. A golf liability policy at $7.70 for three years or an all sports policy at $12.50 for three years, would have saved the golfer $5.000 of the $6,000. and for a trifling addition in premium he would not have had to worry about any of the costs or judgement.

R. C. CANINE, YOUR EDITOR, SAYS HE IS ENJOYING VACATION

Word has just been reveived from R. C. Canine editor of the Daly City Record who along with his wife are attending the Typographical Convention at Colorado Springs. Mr Canine is a delagate for the San Mateo Typographical Union and during his stay in Colorado he intends to call on his many friends in that part of the country. The contents of the letter just received indicate that Mr. and Mrs. Canine are having a very delightful holiday and they expect to be away for some time.

Robert Rolling of New Philadelphia, O., appears to have some old fashioned notions concerning a husband's authority. When his wife persisted in strolling about town in a bathing suit, in spite of his order to desist, he sued for divorce.

NEW ELECTRIC LINE

Support for a proposed electric interurban line between San Mateo and Palo Alto to form a connecting link between the Market Street Ry. and the Peninsula Ry., giving an electric line from San Francisco to San Jose, was sought Wednesday by the Menlo Park Chamber of Commerce from the Mission Merchants' Association. A letter urging approval for the project was read at the Mission Masonic Temple Tuesday night and arrangements were made to have speakers discuss the proposal at the next meeting.

JUDGE EDWARD FARRELL EXTENDS HIS APPRECIATION

I wish to express my deep appreciation for your confidence in me as shown by the vote I received at the Primary election. For a time it appeared as though the vote would put me over at the Primaries but later developments proved this was not the case. So I hope that all my good friends will get together at the November elections and make it possible for me in the next four years to prove myself worthy of their trust. Thanking you again, I am very truly yours,

EDWARD FARRELL
JUSTICE of the PEACE.

Mrs. Elvira Stone of Lemont, Ill., aged 90, escaped from a burning residence by climbing over a steep roof.

FEDERAL AID VICTORY INSURES NATIONAL PROGRESS

Passage by congress of the federal aid appropriation, which was recently approved by the president, means the continuation, unhampered, of the American road building program. Few things will make a greater contribution in the immediate future to the progress, prosperity, and solidarity of the nation. With this encouragement from the federal government the states will carry on construction of that great system of national highways first definitely established under the highway act of 1921.

Continuation of this wise policy of state and federal cooperation in highway building, although overwhelmingly supported in congress and generally favored by the people, was not accomplished without a nation-wide campaign by its supporters. The appropriation of $75,000,000 for each of the fiscal years 1928 to 1929 was strenuously opposed in the senate by a small group of eastern men who threatened a filibuster and who, apparently, from a national point of view, have no conception of the importance of highways.

Their rich constituencies are able, they assert, to build their own highways and for those beyond the borders of their states they have no concern. The need and desirability of continuous trunk highways, binding together all sections of the country, bringing the citizenship closer together, and providing, also, for the national defense, means nothing to them.

The West, whose great natural resources contribute annually to the wealth of the East, has ever been alert to the necessity of highway construction as a means of development. Alarmed by the growing hostility of certain eastern interests, the western states, in the face of the cry sectionalism, began the campaign that rallied the friends of federal aid from every state in the union. Never before in the history of this legislation, reported Congressman Dowell, did an appropriation have such unanimous support as was accorded the 1926 federal aid bill.

The state of California will receive from this appropriation approximately $2,500,000 a year, a small share of what the state undoubtedly will expend for highway during the same period. California eventually could complete her highway system without additional federal aid, but she recognizes that progress in other western states, where great areas are still in federal ownership, would stop almost altogether without the helping hand of the national government; the continuity of the whole highway building program of the country, of far greater importance than actual cash contributions from Washington, would be destroyed.

The California highway commission is proud to have had a part in bringing about favorable action by the congress. In the dark hours when some went so far as to predict an overthrow of the federal aid policy by the recently adjourned congress, Chairman Harvey M. Toy, by personal appeal to civic organizations, governors, highway officials, congressmen, and senators, urged united action by the western commonwealths. The warning from the west found willing workers beyond the Rockies, who convinced congress that the great majority of the people of all classes throughout the country desired continuation of federal aid for roads. Eventually there came to its support the American Association of State Highway Officials, American Automobile Association, American Bankers Association American Farm Bureau Federation, American Federation of Labor, National Grange, American Road Builders Association, National Automobile Chamber of Commerce, and the Chamber of Commerce of the United States.

It is to be hoped that the wisdom of federal aid, or the attitude of the people toward it, will not again be questioned until an improved highway connects every community in every state of the union.

VISITOR URGES CHILD STUDY

Miss Grace Abbott, chief of the Children's Bureau of Washington D. C., recently urged the members of the Community Chest, the San Francisco Center and the baby hygiene committee to aid that activity which is concerned with the youth of the land. Miss Abbott used the following slogans to emphasize her arguments

No crop in California will pay like its children, and by them the state will be known.

We want a new standard of health work for children to come from the West.

It is not the richest people who help children most, but those who care.

Miss Abbott described the scope of work which conducts investigations of delinquency problems, infant mortality, code commissions for children, community control of rickets, and posture work, besides many other details of child health. Too little money, in her opinion, is given by the goverment for the aid of children in comparison with the large sums appropriated for commercial and economic projects. Miss Abbott is interested in seeing the infant death rate reduced in this country, since at the present time the United States is behind New Zealand, though in point of interest and in attainments of medical science she feels that America is far more advanced.

Articles found in the stomach of a cow butchered in Kansas City included shotgun and pistol cartridge shells, wire nails and scraps of brass, iron and steel.

The Texas railroad commission refused to act upon a complaint of a woman who asked that men be prohibited from removing their shoes on trains in that state.

Collision with a truck smashed a hearse near Palatine, Ill., but the coffin it contained was not damaged.

SIDELIGHTS

By Marcy B. Darnall

Comptroller General Mc Carl maintains his reputation for vigilance in guarding the public treasury. He approved a bill of a prohibition agent for $27.75 worth of liquors purchased, but turned down an item of $25 as expenses of a lady who accompanied the officer to a road house to secure evidence.

Cleanliness may be next to godliness, but it didn't keep two University of Pennsylvania students out of jail. They were arrested when found taking a bath in the home of Judge Starbuck of Philadelphia, which they had entered without permission.

Diversified farming has been found advantageous by a man in Dallas county, Texas, who this season decreased his cotton acreage and planted a nice patch of sorghum. While cutting his sorghum the other day he discovered hidden in the field 560 bottles of real beer.

Civic zeal has seldom been shown in a greater degree than was recently exhibited by the chamber of commerce of New Brunswick, N. J. That live organization of go-getters asked the governor to call off further investigation of the murder of Rev. Hall and his choir singer, on the ground that the notoriety resulting therefrom was hurting the town.

Paul Marcellini of New York is rejoicing in the fact that he is entitled to an annual vacation with pay. Arrested for speeding, he was given a $50 fine or the alternative of 10 days in jail. He counted out the $50, then put it back into his pocket, saying. "I've got 10 days vacation left; I'll just go to jail and save this fifty.

Orville Wright recently declared that many people who have no reason to fly except the desire for a thrill are afflicted with a disease, according to a Canadian newspaper. Some call it by such names as "flyphoid fever." "inflewenza," and aerosipelas." Mr Wright suggests "skyatica."

Many suggestions for handling the traffic congestion problem have been made, some of which are helpful; others quite absurd. Will Rogers has offered a solution worth considering: Keep all the cars that haven't been paid for off the streets.

"Music Aids Morals"—Headline. Good or bad?

Money cannot buy happiness, but it can buy a lot of fun.

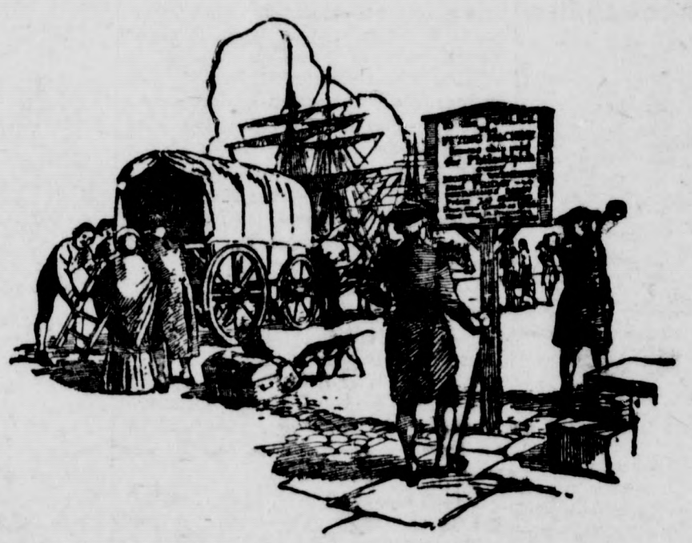
Some think that all big business dishonest, unless it happens to be by Henry Ford.

Geometrically and politica speaking, a ring is a crooked aff that has no ending.

THE VOICE OF THE LIBERTY BEL

This is one of the two new official posters of the Sesqui-Centennial In national Exposition, opening in Philadelphia June 1 to celebrate 150 ye of American Independence. The Exposition will continue to December Dan Smith, the artist, has symbolized the epoch in history which the toll of the Liberty Bell in Independence Hall, July 4, 1776, marked and depicted the growth of the United States from the original thirteen sta represented by the thirteen stars which emerge from the mouth of Liberty Bell.



Conquering Limitations

JOHN MERCEREAU'S stage coach lumbered its creaking way from New York to Philadelphia in a day and a half, in 1771, and was considered so fast that it was called "The Flying Machine." When steam came into use, there were the "Comet," the "Thunderbolt" and similar names, suggesting the attainment of the age-old need—speedy messengers.

Man's effort to overcome the limitations of time and distance finally put electricity to work, and it became his swiftest message bearer.

Half a century ago Bell invented the telephone. It is more than a messenger, for it has been developed to carry man's spoken words for great distances with the swiftness of light. Through its wizardry space is conquered with the speed of thought itself.

CALIFORNIA NEWS BRIEFS

An example of what thrift, hard work and good management will do to provide necessities and some comforts for a wife and family has been demonstrated by P. W. Perdue, a former resident of Texas, who came to Oakdale, Stanislaus county, about two years ago. During the past year he has been employed by a rock company and worked his regular shift at the company plant and at odd times has planted and cared for a cotton crop of eleven acres one-half mile from the city limits. Most of Perdue's work at the plant was on night shift and after getting his sleep and rest in the mornings, a part of the day was spent in taking care of the crop. The cotton is now maturing and with the aid of two small sons he has gathered about 400 pounds and open bolls are seen all over the patch. Perdue estimates the yield at three-fourths of a bale to acre where irrigation was used.

Births, deaths and marriages in California during the first six months of the present year all show substantial increases over the corresponding period of 1925, it was announced by L. E. Ross, director of the State Bureau of Vital Statistics. Ross' official semi-annual figures disclosed the greatest percentage of increase in births, 40,503 being recorded for the first six months of 1926 as compared with 38,444 in the first half of 1925. This is a gain of 2,059 or 5.4 per cent. The semi-annual marriage figures reveal an increase of 3 per cent. The first half of this year witnessed 26,675 weddings in the state, as against 25,923 in the corresponding 1925 period. The 1926 death toll was given as 30,382, an increase of 2.2 per cent Infant mortality, however, decreased 13.1 per cent.

Thirty tons of almonds per day are being received by the Arbuckle, Colusa county, warehouse of the California Almond Growers' exchange. Twelve hundred tons are expected to be handled by the association this year. This is about one-tenth of the state crop. An early estimate of the crop figured 100 per cent increase over last year's crop. Picking to date shows the increase to be over 300 per cent increase. Prices have not been set by the almond growers' association for this year.

Sutter county has found a place for the under-sized peaches which the canneries have been rejecting. The smaller fruit promises to come into its own, according to E. E. Wernex of Yuba City, buyer for a San Francisco syrup company. Wernex this season, purchased several hundred tons of the under-sized fruit for his firm, shipping the peaches to the San Francisco factory, where it was peeled, concerted into rich syrup and sent to the trade in jars. Various varieties of the fruit are being used in the process.

The Cuyama highway was turned over to the state highway commission at a meeting of the directors of the joint district, comprising Kern, Ventura and San Luis Obispo counties, held in San Francisco, recently. The highway is between Maricopa in Kern county and Santa Maria, and under the plant it has been incorporated as part of the state highway system, and its maintenance will be in charge of the state highway department in the future.

Watermelons grown in Redlands and in the Moreno valley are now on the market and are proving to be so much better than the melons shipped in at this time that the local growers are able to secure a half-cent a pound more for their product. The Redlands cantaloupes are also bringing a better price than those from the outside. The melons grown around Mentone and on the sand in the Lugonia section are also of good quality.

Thirty prominent men of the state including University of California professors, members of the California Bar, and other professional and business men demonstrated their ability to earn a living by hand labor this summer, by building themselves a clubhouse of stone and timber one-half mile from the summit of the Sierras, above Truckee. The clubhouse will serve as a winter home for the California Ski Club.

First steps toward insuring a permanent, adequate water supply for Alum Rock park, municipal mountain resort seven miles west of San Jose, have been taken by the San Jose city officials with the filing of an application with the state department of public works for 500-acre feet of water a year from the north fork of the Penitencia creek, which flows through the park.

The board of trustees of the Marysville Union High School has announced that actual construction of the new union high school plant, to be erected at Knights Recreation Park under a bond issue of $400,000, will commence December 1, and that the building will be ready for the commencement exercises next June.

Sixty-two of the 166 candidates who successfully passed the California Bar Examinations given by the board of examiners in the District Court of Appeals this month were graduates of the University of California College of Law.

Sacramento is practically the chief distributing point for agricultural and mining labor in California now. Such was the gist of a statement made by A. G. Anderson, manager of the state free employment bureau in Sacramento, in giving a general survey on the labor conditions in this vicinity.

Placer county fruitgrowers will hold thier sixth annual convention in Auburn during October at a date to be determined within a short time.

The Boswell Gin at Corcoran, is installing $7,500 worth of machinery to manufacture cottonseed cake, largely used by dairymen for feeding cows.

Approximutely $85,000 worth of street improvements will be started at once in San Fernando, according to action of the city council of that city.

The Petaluma chamber of commerce has decided to place an exhibit advertising Petaluma industry in the Los Angeles publicity building next year.

Preparations are being made for a three-days' harvest festival to be held in Santa Rosa commencing September 22. It is planned to make this a home-coming time for all former Santa Rosans.

Work has been started on the foundation of the new building of the Chinese Methodist Episcopal church at Sacramento. The building, when completed, will represent a cost of approximately $20,000.

Fifty dollars a ton is offered for grapes at Cloverdale, Sonoma county. Growers are holding off for what is believed to be a coming advance in prices. Grape picking will be in full blast about the middle of the month.

The Johnson Act regulating the manufacture and sale of butter substitutes and held up on the referendum, was endorsed by the Farm Bureau Regional Conference of District No. 3 in session at Hanford a short time ago.

Rapid progress is showing on the construction of the dams and tunnels on the $8,000,000 project of the Feather River Power company on the North Fork of the Feather River watershed, near Meadow Valley, Plumas county.

Plans are being made to have State Engineer Paul Bailey address the citizens of Hanford and Kings county at an early date on the plan to transfer the surplus waters of the Sacramento to the San Joaquin valley for purposes of irrigation.

Grace Bull of Modesto, was elected second vice-president of the California Federation of Business and Professional Women's Clubs at the annual convention which closed in Modesto. Mrs. Margaret D. Yale of Burbank, was elected to the presidency.

The rapidly increasing popularity of Camp Sacramento, Sacramento's vacation camp in the Sierras, as a vacation place for Sacramentans resulted in City Manager H. C. Bottorff authorizing the construction of five additional buildings at the camp.

What is believed by C. C. Evans, manager of the Oroville Fruit and Produce Exchange, to be the the first pomegranate shipment to leave California this year is on its way to Rochester, N, Y., by express. The fruit came from the Gede ranch in Thermalito.

County Farm Advisor H. A. Weinland, Sonoma county, and Dr. E. Dobbs of the veterinary division of the University of California, made an investigation in the coast section to determine the nature of the malady that has caused the death of many sheep in the last few weeks.

Radio advertising of grapes grown in the El Camino district has created such a demand in Missouri, Iowa and Nebraska, that the owners of Station KFNF have sent an urgent call to arrange for the shipment of two carloads a week for the balance of the season. The fruit is sold right from the car as soon as it arrives from Gerber.

Plans to install a telescope at Mt. Wilson Observatory measuring 300 inches in diameter and to cost $12,000,000 soon will be given publicity in an article by Francis G. Pease of the observatory staff, Los Angeles, to be published by the Astronomical Society of the Pacific. The present telescopic lens measures 100 inches in diameter.

Fruit trees in Kern county are being seriously threatened by the red spider, according to the horticultural commissioner. The ravages of the spider during the present year have not been so severe locally, as during 1925 and the preceding year; nevertheless, it is important that more rigorous and effective warfare must be against it.

The board of supervisors of Napa county voted to put up to the voters of the county at the November election the proposition of a bond issue for $100,000, to be used for the construction of memorial halls in Napa, St. Helena and Calistoga. This decision was reached after a conference with committees representing the American Legion posts of each of the above towns.

A tract of almost twelve acres of land on the University farm at Davis, is being prepared for the division of truck crops for work with sugar beets. This important crop has been subject to the depredations of the leaf hopper for the past eight or ten years with increasing destruction each year. It is the object of this division to develop, by breeding, strains of the sugar beet resistant to the leaf hopper.

Fred Hoyt, of Eureka, Calif., aviator was adjudged the winner of the "on to the Sesqui" race, having flown the 2,558 miles in twenty-one hours flying time. The announcement was made as the pick of American aviators prepared for the national air races at Model Farms Flying Field. Hoyt was given a cash prize of $1,200 for his feat andwa s presented the Sesqui-Centennial trophy, which will become his permanent possession. He left Eureka August 25 and landed in Philadelphia September 1, at 6 a.m. The elapsed time was 146 hours. He made one forced landing in Ohio.

THE WORLD'S GREAT EVENTS

ALBERT PAYSON TERHUNE

(© by Dodd, Mead & Company.)

The Norsemen

"FROM the fury of the Norsemen—good Lord deliver us!"

This line from the ancient church litany sums up in one sentence the terror inspired all over the civilized earth by the Scandinavian sea-rovers of the Ninth and Tenth centuries A. D.

On the sterile coasts of Norway, Sweden and Denmark lived a hardy race, known to the world at large as "Danes" or "Northmen." Their own rocky countries could not support them. The love of wandering and of battle was hot within them. They were almost amphibious in their devotion to the sea. Thus, just as Europe was beginning to settle into some sort of international peace and stability of government after the turmoil of the dark ages, down swooped hordes of these wild Northmen upon nearly every rich and fertile country they could find, burning, murdering, looting, conquering.

It was the "northern peril" the people of that day dreaded. For no coast-dweller of England, France, Germany or Italy could tell on what morning he might awake to see the horizon dotted by the serpent-prowed, long-oared, shield-hung galleys of the invaders, or find his city in the merciless grip of half-naked, yellow-haired barbarians.

It was before the day of telegraphs, cables or any means of rapid communication. Hence, there was no forewarning of the swift, terrible raids, no opportunity to mass a sufficient force to repel them.

Much poetical luster has since been cast upon the Northmen. As a matter of fact, they were simply pirates, sea-robbers, cutthroats. They had no stable government, no modern laws. Each community was ruled by the admiral of some particular pirate fleet. He was known as a "sea king" or Viking. The victims had no way of retaliating. By the time an army of resistance could be raised the Vikings were at sea again and had vanished into the mysterious North. They were men of iron, their climate and poverty having accustomed them to bear cold, hunger and every other privation without injury. They had no settled home, no patriotic ambition; no pleasures, save war and feasting.

Yet they left their mark on the world and on its history. Under a Viking named Rollo a party of Northmen ravaged France in 912 A. D., plundering Paris and putting the French king at their mercy. To appease them, the king gave Rollo a vast tract of French land and made him a duke. On this land the raiders settled, the name Northmen changing to Norman, and their new dukedom taking the title of Normandy. It was a direct and near descendant of Rollo who was destined later to conquer England and change the English language, law and government.

For two centuries Great Britain was devastated by the Northmen, Alfred the Great being the only king who scored any permanent success in clearing the land of them. But on Alfred's death they returned in fresh numbers and soon conquered all England. For many years they ruled the country.

Little by little, as large colonies of Northmen invaded and conquered other lands, settling down in their new possessions, they became merged in the former populations of those countries, lending fresh vigor, energy and hardihood to the conquered races, but losing their own Norse identity. There thus developed a trace of sea-rover blood in nearly every European race, leading nations to aggressive conquest, to exploration, to marine trade and to personal prowess. In time Scandinavia lost so many men by those wholesale emigrations that there were no longer enough left to terrorize other countries.

Eric the Red, a ruddy-haired, ruddy-faced Scandinavian pirate, discovered Greenland late in the Tenth century and settled there. Then in the year 1000, according to many authorities, Eric's son, Leif, sailed on a foraging and exploring expedition, with a crew of thirty-five men. They lost their bearings and sailed westward before a gale, arriving at last at a wonderful country such as they had never before seen or heard of. It was North America they had blundered upon. From the masses of wild grapes at the various spots where they landed, they named the new country Vineland, and sailed back to report their discovery.

Seven years later a colony of sixty Greenlanders came to America and, landing, it is said, on the shores of Rhode Island, formed what was planned to be a permanent settlement. This settlement for a time flourished, but soon all trace of it ends. Its people were probably massacred by Indians.

For 400 years longer America was destined to lie undiscovered. Yet to the Northmen this country owes a vast debt. For it was due largely to rumors and traditions of Leif's voyages that Columbus first conceived the idea that there was a continent to the westward. It was due also to the love of the sea and the tendency to explore implanted in Europeans' hearts by a Norse ancestry that Columbus' voyages were rendered possible.

So America, as well as the older countries of the earth, has cause to think kindly of the murderous, yellow-haired Norse giants whose name was once a terror to the whole civilized world.

Surgical Operations of No Avail as Cure for Criminal Propensities

By DR. SHEPHERD L. FRANTZ, University of California.

OPERATIONS on the skull to remove the cause of crime are unwarranted medical practice. The supposition that a bony protuberance of the cranium or some malformation due to accident may press on the brain and be the specific cause of wrongdoing should be relegated to the limbo of phrenology or like pseudo-science. Surgeons of questionable ethical standards, with prospects of a high fee, have been willing to operate on a criminal, the purpose, in part, being to influence a trial court in the direction of leniency. In some cases of this sort the patient, profoundly influenced by so serious an operation on himself, has actually been led to believe that the treatment has cured him. Thus purely by suggestion he deserts the criminal life. To this extent only is the cranial operation of any value.

Extended experiments in brain operation have proved that the upper brain structure works generally as a whole, and not in specialized departments. Damage or pressure on one spot does not throw any one faculty alone out of commission, nor does any single faculty or sense belong solely to one unique location.

Latin-American Peoples Still in Fear of United States Aggression

By DR. L. S. ROWE, Pan-American Union.

The Monroe doctrine, instead of bringing the Latin-American countries into closer contact with the United States and instilling a spirit of mutual trust, has eliminated from the minds of Latin-American peoples all fear of aggression from any portion of the world but the United States.

Conscious of the great economic and political power that the United States has acquired, and recognizing that history contains no record of a nation who used without abusing a like degree of power, there is a constant question in the Latin-American mind.

The general attitude during the past twenty years has shown steady improvement, however, and the higher standards of American business and business men who are making permanent investments in Latin-America are contributing greatly to the increase in good feeling between this country and her southern neighbors.

Development of Intellect Goes Hand-in-Hand With Mankind's Pleasures

By PROF. EDWARD L. THORNDIKE, Columbia University.

Nowhere more truly than in his mental capacities is man a part of nature. Among the minds of animals, that of man leads, not as a demigod from another planet, but as a king from a race. Pleasure is a symptom of welfare. The function of intellect is to provide a means of modifying our reactions to the circumstances of life so that we may secure pleasure.

The intellectual evolution of the animal kingdom consists in an increase in the number, delicacy, complexity, permanence and speed of formation of such associations. In man this increase reaches such a point that an apparently new type of mind results, which conceals the real continuity of the process.

His instincts, that is, his inborn tendencies to feel and act in certain ways, show throughout marks of kinship with the lower animals, especially with our nearest relatives physically, the primates, such as the chimpanzee and gorilla.

American Labor on Far Higher Plane Than That of Europe

By LORD BUCKMASTER, Former English Lord Chancellor.

In the report of the British Trade union mission to the United States I have found four reasons for American industrial supremacy. These are: first, the spirit of co-operation and fellowship throughout the industry from the highest official to the man sweeping the floor; second, the willingness and eagerness of everybody to increase output; third, the fact that high wages in any one industry benefited industry everywhere; and fourth, the readiness of employers to scrap old machinery and to do everything in their power to use equipment that could give the greatest effect to human labor.

No one who has the most trifling knowledge of American industry can fail to realize the truth of what the mission reports. The condition of labor over there is easier than here—easier not by reason of shorter hours or of lessened labor, but by reason of the environment in which it is placed and the high standard of wages that it commands.

Time of Students Wasted Through Neglect of Proper Classification

By DR. GEORGE F. ZOOK, Prominent Educator.

American colleges and universities are illogical organizations which waste at least a year of each student's time because of failure to classify the students according to their abilities.

Boys and girls from all walks of life and of every variety of intelligence are being admitted without proper classification of the course to be pursued. We do a bad job of lumping them together.

It is the duty of the secondary schools to induce those who have the ability to do college work to attend college, and in some way to encourage those who do not to take special vocational work to fit them for earning a livelihood.

Dishonesty and Immodesty Too Prevalent Among Youth of Today

By REV. ROY J. BRUMBAUGH, Philadelphia.

It has been proved that 64 per cent of the young people of America today are dishonest. These facts were gained through tests made by clerks in different stores. Young people of the present day demand super-excitement and then try vainly for something that will give them a still greater thrill.

Young women in most cases are immodest and are able to carry their wardrobe around in their hand purses. It is a well-known fact that immodesty leads to immorality. All of the young boys with whom I have come in contact are profane in their speech. Of course, temptations have multiplied a great deal in the last twenty years, although we find that those who survive are the highest type of young people ever developed.

CONSTITUTION DAY

While Constitution Day, September 17, is not a legal holiday it is observed with approprt exercises in many schools, and various patriotic societies employ the occasion to visions of our nation's organic law.

The Constitution of the United States was adopted on September 17, 1787, by the convention appointed in pursuance of a resolution of Congress. Washington presided over the convention, which was composed of 55 delegates, representing each of the original 13 states except Rhode Island, and that body was in session nearly four months. The final draft of the Constitution was made by Governor Morris, a delegate from Pennsylvania.

Delaware was the first state to ratify the Constitution which it did on December 7, 1787, and Rhode Island was the last, its date of ratification being May 29, 1790.

The first ten amendments, popularly known as the Bill of Rights, were proposed together, and adopted by the required number of states by December 15, 1791. Only two other amendments were adopted prior to the Civil War between 1865 and 1870 three more were added. Since then four additional amendments have been adopted, providing for the income tax, direct election of United States senators, prohibition and women's suffrage.

Every citizen of the United States should read the Constitution and its amendments at least once a year and Constitution Day is a very appropirate occasion for the purpose.

THE WEEKLY PAPER

one of the undisputed developements

The power of the weekly paper is in journalism. The great dailies are certainly not great because they are thoroughly read, but rather because they use up lots of ink and space. It's the weekly paper that gets the attentive audience, including every member of the family, and because of its special stress upon the home news and home interests attains the maximum of reader interest.

The 20,000 weekly newspapers in the United States are ever on the side of their readers; their editors and owners are known personally to the people, and they cannot deviate from the wishes of the majority. This is certainly not true of the great daily

In only a few conspicious instances do readers know their editors, or who they are, while the owners, as a rule are of, for and by the interests.

The weekly papers are the saving power of American journalism because they are the best advertising mediums in the country. Their once-a-week timely appeal to the women home-need buyers is becoming more and more evident to local and national advertisers. Local merchants who want to keep Daly City trade in Daly City should take cognizance of this fact, and make freer and more intelligent use of the advertising columns of the favorite "home" paper —the Daly City Record— the real home-trade advocate.

EARLY CONSERVATION

There has been a great deal of attention given to conservation of natural resources during the past few years, and many may be under the impression that this movement is comparatively new. But such is not the case.

Someone has discovered in the records of the Massachusetts Colony a court order 300 years old, which directed the conservation of timber. This order, dated March 29, 1626, decreed as follows:

"That for the preventing of inconveniences as do and may befall the plantation by the water of timber, that no man of what condition soever sell or transport any manner of works or frames for houses, planks, boards, shalops, boats, canoes or what so ever may tend to the destruction of timber aforesaid; how little so ever the quantity be; without the consent, approbation and liking of the Governour and Counsell."

Commenting on this display of foresight by the early settlers of the Massachusetts Colony, the Atlanta Georgian says: "The early law may seem to have been entirely uncalled for, but the farmers were looking ahead decades and centuries. They were right, as time has proved, but their decendants forgot the warning thus uttered by the fathers, and little by little wastage took the place of careful use. Today great stretches of the country lie denuded of their forests. Every year there are felled enough trees to cover an area equal to all of Massachusetts, Connecticut and New Jersey combined."

Many government and private agencies are striving to check this frightful depletion of our timber, and every citizen should lend his wholehearted support to the conservation movement. We should emulate the spirit of the pioneers of 300 years ago.

THE PHYSICAL WELFARE OF OUR SCHOOL CHILDREN

The irregular attendance of school children costs this country $175,000,000 a year This huge waste in our educational system is little short of an economic crime, in the face of evidence furnished by health authorities that the majority of time children lose from school is due to correctable phyical defects.

In the United States, a country proud of its educational facilities and the free opportunity afforded everyone, the number of days enrolled pupils attend school during the year averages from 96 in rural schools to 143 in city schools.

The hue and cry for bigger and better buildings, more teachers, free text-books all worthy and commendable in themselves is today being accompanied by another cry from educators and health authorities. And their cry is: "Let us improve our educational facilities, but let us also make better use of what we have."

This is food for thought for every mother who is to launch her "baby" on the important and eventful journey through the land of education. Thousands of mothers will realize with a start this fall that "baby" is a baby no longer;that he has reached the ripe old age of six years, and is ready to start school.

But is he really ready? Readiness embodies something more than having reached the required age, as the foregoing figures testify. Many of these thousands of children who are costing the nation $175,000,000 a year, and also costing their parents untold worry, can trace their troubles to unpreparedness. It is just as futile to start a child to school with diseased tonsils, impaired vision, or defective hearing, as it is to start on a transcontinental automobile trip with a flat tire and an engine "hitting" on three cylinders. You may get there, but you will have a struggle and big bills. Likewise your child may"pull through," he may make his grades, but he will be fighting terrible obstacles, and will be placed in unfair competition with his healthier fellow students. Moreover his frequent illnesses will be expensive.

The wisest course, the most economical and the only satisfactory course, is to give the child about to enter school the same " overhauling you would give your car before starting on an important journey. Take him to a doctor and have him thoroughly examined. If you are one of the few parents whose child has no physical defects to be corrected, you can indeed congratulate yourself for only 25 per cent of the children in this country, authorities tell us, are in this class.

Remember that an ounce of prevention is worth infinitely more than all the cures in the world. The tragic part of it is that often there is no cure.Little phyisical defects, insignificant in themselves, perhaps hardly noticeable except by a doctor, can sometimes do irreparable damage. Defective vision, for example, may be so slight that the child's sight is apparen'ly normal. Yet, constant strain thrown on the eyes from this defect may lead to other compli cations, which eventually may cause serious eye trouble

NOT WORRYING MUCH —MEANING THE APE

The ape is descended from man and not man from the ape, according to Professor Max Westenhofer, custodian of the Pathological Museum of the Berlin University.

He points out that chimpanzee cubs resemble human beings much more than do their parents. He says that certain human inner organs evidence that man's ancestors lived for a time in water.

These peculiar characteristics are missing in apes which, he declares, shows that the ape represents the subsequent development and proves that man is the older form of mammal."

Prof. Westenhofer elucidated this theory before the anthropoligical congress, now at session in Salsburg.

U. S. TO HAVE NEW OBSERVATION PLANT

As soon as seismographic instruments can be built and set up, the first volcano observation station in the United States will be established on Lassen Peak.

R. H. Finch, representing the Volcanologic section of the U. S. Geological Survey, passed through this way recently en route to Red Bluff, where he will construct instruments and make preparations for establishment of the volcanic observation headquarters at Mineral, Tehama county.

For the past seven years Finch has been stationed at the Kilauea volcano in Hawaii under Dr. T. A. Jagger, chief of the volcanologic section. By a recent act of Congress funds were provided for the station at Lassen and plans call for a similar one in Alaska next year.

With seismographs, Finch will be able to locate earthquakes any place in the world, but the instruments are so designed as to locate local shakes to the best advantage.

Peace, Goodwill

Columbia, Peace and the Spirit of Brotherly love have been joined in one person, a beautiful woman. This young lady was one of the central figures in a pageant staged at the Sesqui-Centennial International Exposition in Philadelphia, celebrating 150 years of American Independence. The Exposition continues until December 1.

Caloric Requirements of the Child

DIETITIANS declare that the average boy or girl of four years should receive about forty calories a pound of body weight per day. The average weight of a child of four years is forty pounds. Therefore the total caloric requirement would be approximately 1,600 calories. Calory is merely the name for a certain measure of heat derived from the burning of food.

Necessarily, the caloric requirement of the child is dependent on his temperament, since a child who plays hard and long requires more nourishment than one who leads a quieter life. Rate of growth also has a bearing on caloric requirements. The child who is growing rapidly should be given more food to meet his caloric needs than the boy or girl whose growth is normal.

Mothers know the daily diet should consist of the essential foodstuffs, protein, carbohyrates, fats, minerals and water. The important thing for her is to learn the foods that contain these essentials in a balanced diet. Below is a well-balanced menu for any child six years old compiled by an authority on home economics.

ONE DAY'S MENU FOR SIX-YEAR-OLD CHILD.

Breakfast.

6 stewed prunes	120 calories
½ cupful cream of wheat	85 calories
Served with half cream (6 tbsp.) and half evaporated milk	140 calories
1 slice buttered toast	150 calories
1 cup cocoa made with evaporated milk	150 calories
	645 calories

Luncheon at School.

Baked potato and butter.	200 calories
½ cupful spinach	25 calories
1 baked apple (1 tbsp. sugar, ½ tbsp. butter)	200 calories
1 glass milk	160 calories
1 slice bread buttered with ½ tbsp. butter	100 calories
	685 calories

Afternoon Luncheon at School.

1 orange	100 calories

Dinner.

1 small piece broiled steak (2¼ x 2½ x ½)	75 calories
½ cupful mashed potato	100 calories
2-3 cupful lima bean soup made with evaporated milk	75 calories
1 glass milk, orange drink	160 calories
	510 calories
Total	1,840 calories

Children often become wearied of drinking plain milk. Mixing their milk with fruit juices is a welcome change. Following is the recipe for a refreshing milk drink: Mix ⅞ cupful orange juice, ¼ cupful evaporated milk, three teaspoonfuls of sugar, ½ teaspoonful of lemon juice and a few grains of salt. Shake well in a fruit jar before serving.

Mrs. Jordan Baker of Worcester, Mass, acted as her own lawyer in defeating her husband's divorce suit. When a witness was reluctant to testify, Mrs. Baker said: "Remember I'm not myself; I'm my attorney."

PART OWNERS

The people own the California Power Companies. There are 175,986 on the lists of stockholders.

Almost every city and town in California is represented and people from all walks of life are included. The average ownership is 15 shares—Truly this is people's ownership.

One of every 4 families is financially interested thru securities (Stocks and/or Bonds) held.

Colma News Notes

By SYLVIA FISCHER

Mrs. Michelson attended the Admission Day Celebration in Sacramento.

Mrs. Annie Biggio and children Ruth and Henry spent last Saturday at Ingelside Beach.

The ballgame between Colma and San Bruno was postponed last Sunday and will be played this Sunday at San Bruno.

Mrs. B. W. Haubrich Mrs. S. V. Fischer and Bennie Haubrich attended the Wild West show in San Francisco last Sunday.

Jonnie O'Connor, Robert Wall and Eddie Michelson attended the September 9th Celebration held at Sacramento.

Miss Thelma Selmi has accepted a position with a San Francisco business house, and commenced work last Wednesday.

Mrs. Joseph Merlo and daughters, Misses Rose, Inez and Lorraine Merlo spent the past week at Mountain View with Mrs. Garibaldi.

The Estrada Spanish Kitchen in Colma, will be moved back 50 feet off the highway when operations on the bottleneck commence.

Mrs. Louis Merlo of the Olcese Apartments spent the past week with Miss Delucchi at the home of her parents in Mountain View.

Mrs. Lagomarsino spent several days of last week with relitaves in Sacramento and attended the Admission Day Celebration.

Miss Theresa Stampanoni and Emily Oyhancabal accompanied by friends attended the September 9th celebration held at Sacramento.

Mrs. Fredericka Volkman and a party of friends spent several days of last week in Sacramento and attended the Admission Day Celebration

Many local people plan to attend the benefit circus and rodeo to be held at Tanforan on Sunday, to raise funds for a new lake in Golden Gate Park.

Mr. and Mrs. Edward Ford motored to Sacramento to see the Drill Team of the El Carmelo Parlor No.181, Native Daughters of the Golden West in the Admission Day parade.

A novelty dance will be sponsored by the Buddies Social Club in the Colma Auditorium on Saturday evening September 18, a large crowd is expected to be present on this occasion.

A novelty cabaret dance will be sponsored for the benefit of the Colma Community Center in the Colombo Auditorium on San Pedro Avenue on Saturday evening October 25. Jonnie Degliantoni and his surprise orchestra will provide the music.

William Ottoboni, Frances Bracken, Fred Collins and Otto Schramn were all present at the State Fair Grounds when the silvercup was presented to the Drill Team of the El. Carmelo Parlor No.181 Native Daughters of the Golden West.

High class entertainment will be one of the features of the cabaret dance to be given in the Colombo Auditorium for the benefit of the Community Center on Saturday evening October 25.

Mrs. Helena O'Connor of Evergreen Avenue who is greatly interested in the El Carmelo Parlor No. 181, Native Daughters of the Golden West journeyed to Sacramento in order to see El Carmelo Drill Team in the Admission Day Parade. Mrs. O'Connor declared that the Dril Team looked splendid.

The members of the Drill Team of El Carmelo Parlor No. 181, Native Daughters af the Golden West wish to thank Messrs. Fred Collins Frances Bracken, Otto Schramn and W. Ottoboni for the untiring help, and interest during the past year and during the Admission Day Celebration.

A large crowd attended the whist party given by El Carmelo Parlor No. 181, Native Daughters of the Golden West in Masonic Hall, Daly City. The officers of the parlor, headed by President Annie Biggio were in charge of the affair. Next month a monster whist party is to be given for the benefit of the homeless children.

The Ladies' Auxiliary of the Colma Community Center held a splendid meeting in the community center building on Dunk Street near Washington last Tuesday afternoon, with manyof the ladies of the community present. Plans were discussed for the cabaret dance to be given on October 25 in the Colombo Auditorium.

Miss Romilda Romaccioti was tendered a surprise shower last Monday evening by Miss Teresa Stampanoni at her home on San Pedro Avenue. The rooms were artistically decorated for the occasion and a delightful evening of songs, games and dancing was enjoyed by all; Among those present were Miss Violet Ver Linden, Miss Fabian Ver Linden, Miss Romilda Romaccioti, Miss Teresa Stampanoni, Miss Annita Varni, Miss Stella Atkinson, Miss Josephine Lee, Miss Elsie Varni, Mrs. John Meresco, Mrs. Romaciotti and Mrs. Stampanoni.

BOY DROWNS LAST SATURDAY IN BAY BODY FOUND THURS.

(Continued from Page 1)

boating near Pacific City, was recovered Thursday by police of San Mateo and Burlingame.

Identification was made by Floyd Glennon, father of the lad who had led in a search for the body since the tragic accident.

Assistance was called when the body was sighted by the father. It was taken from the water about 200 yards east of the point where young Glennon sank from sight after the capsizing of the boat.

BOYS AND GIRLS

Raymond Duyer, 9-year-old boy of Mansfield, Pa., flagged a train with a handkerchief and averted a wreck, when he saw three trees which had been blown down across the track.

Little Gloria Caruso, daughter of the famed tenor, is said to have inherited her father's vocal talent, and already predictions are made that she will have a great future as an operatic singer.

George Avery of Chicago wanted Robert Smith and wife arrested for "cannibalism", claiming that they had threatened to "eat him up."

WHY GOVERNMENT PRICE FIXING WON'T WORK

One of the most persistent fallacies is government price-fixing on competitive commodities. There is already government price-fixing in commodities and services where competition plays no part in price determination. These are railway transportation, electricity, gas, telephone and telegraph, and so on. Here government price-fixing is solely to protect the consumer. There are two fatal objections to government price-fixing for agricultural products, which represent the most competitive business in the world. These are, first, that it will not work; second, that it is always done for the consumer as against the producer.

Government price-fixing for agricultural products would work if at the same time the government regulated wages, profits, middlemen's margins, the production of all commodities and the rationing of all consumers. In short, if the population were enlisted in one vast army, directed and rationed, price-fixing would work, but otherwise not. If the price is fixed on the wheat the farmer sells, then he cannot keep on producing wheat if wages or the cost of harvesting machinery rise, or if the cost of other material he buys rises. So the next step would be the fixation of other prices, and yet other prices.

The United States government fixed the price of wheat but once in our history, and then it was to benefit consumers, not producers. The government might, in an emergency, fix some agricultural prices for the purpose of elevating such prices. Such action would inevitably and speedily lead to outcry from city consumers and a consequent reversal of policy. Indeed, the consumers, not the producers, are most likely to demand and secure food price regulation by government authorities. The farmer, therefore, who favors any form of governmental price-fixing is working against his own interests. He is putting his head into a noose.—James E. Boyle, Professor of Rural Economics, Cornell University, in the *Banker-Farmer*.

STRAIGHT TALKS WITH AUNT EMMY

On Fifteen Per Cent Bonds

Mrs. Norris beamed as she greeted Aunt Emmy and exclaimed, "Now I know all my financial worries are over! I wanted to tell you right away —"

"What have you bought this time?" Aunt Emmy demanded suspiciously.

"Well, I haven't paid the money over yet, but I have found the loveliest investment where my money will be perfectly safe and will earn a nice income for me right away," Mrs. Norris said. "I'm going to buy bonds, good safe bonds, that will pay me fifteen per cent interest—"

"Wait a minute, you'll have to go some, Maud Norris, to tell me about 'good safe bonds' that pay fifteen per cent!" Aunt Emmy broke in.

"They are safe,—the man said so and this booklet says so too!"

"Do you know what a bond is?" asked Aunt Emmy.

"No, but it's awfully safe. I'm sure of that," Mrs. Norris said. "Everybody knows that bonds are safe—"

"My dear, some bonds are safe and some are not. When you buy a bond you simply lend your money to the company putting out the bonds. Bond issues are secured generally by the company mortgaging or pledging some of its property. In other words, it offers a certain asset as security that it will return your money to you on the date the bond matures. It agrees to pay you a certain sum each year for the use of your money, usually something between five and eight per cent. No company can afford to pay too much for its money—and as to fifteen per cent bonds—why it would be very unusual for a company to be able to earn enough to enable it to pay fifteen per cent for the privilege of using other people's money,—moreover, if it is good enough to borrow money at all it can borrow it more cheaply than that!"

"Oh dear!" wailed Mrs. Norris, "then a bond isn't a good safe investment—"

"Don't jump at conclusions so fast!" said Aunt Emmy. "I did not say that. A bond is as safe as a church if the company that issues it is financially sound, has a high credit rating and is making money. Before you buy bonds assure yourself that the company behind them is above reproach."

"But the man who told me about these fifteen per cent bonds was so earnest—I felt sure I could believe him."

"Don't turn over any money to him until you have some advice on the bonds from your bank," admonished Aunt Emmy. "Then, if you find out that the bonds are questionable you will escape another bad investment." —*A. B. Aymes.*

Mason County, Michigan, bankers are pushing hard to replace scrub stock with pure-bred cattle. The plan as outlined by the county agent is to purchase young pure-bred sires and place them wherever a farmer is found who is willing to co-operate in the proposition. The bankers will advance the purchase price and take a note for one year without interest. The idea is to make it as easy as possible for the farmers to procure thoroughbreds.

STATE TO HAVE NEW FILING CABINETS

Ten bids were received by the State purchasing agent for the steel cabinets and filing equipment for the furnishing of the new division of motor vehicles headquarters in Sacramento today, according to a statement of Will.H. Marsh, chief of the division. The bid of M. G. West of San Francisco in the amount of $22,493.00 was the lowest and its acceptance was recommended to the Board of Control. The bids ranged from the amount of the lowest bidder to $44,900. by Baker-Vawter Company. Bids covered 169 cabinets and 13000 trays which it is estimated will be capable of holding approximately 10,000,000 current files of the department. This is the first move in the direction of equipping the new quarters of the division at Sacramento with all steel furniture. Bids on desks and other equipment will be received later. When fully equipped, Marsh announced, the division headquarters in Sacramento will have the most complete and the finest equipment of any motor vehicle bureau in the United States.

Driving while intoxicated continues to be a major cause of revocations of operators' licenses according to a statement issued by the Division of Motor Vehicles today.

During the months of July and August 20 licenses in the State were revoked for this cause out of a total of 35 revocations for that period. This brings the total number of revocations for the year up to 219, 115 of which, have been made for the serious charge of driving while intoxicated.

ABOUT WOMEN

Mlle. Suzanne Devoyed, popular actress of the famed Comedie Francaise of Paris, has been made a member of the French Legion of Honor in recognition of her work in protecting French children of the stage from exploitation.

Queen Marie of Rumania, accompanied by her daughter, Princess Ilena, will tour the United States and Canada this fall. She is well known to the American public through her syndicated articles for various leading newspapers.

Mrs. Bertha K. Landes, mayor of Seattle, recently explored the bottom of Puget Sound on board the United States submarine S-24.

Miss Lena Phillips, an attorney of New York, has been elected president of the National Federation of Business and Professional Women's Clubs.

More than 300 women of Patterson, N. J., have completed a safety first course for automobile drivers, and are now receiving instruction in the prevention of accidents in the home.

During the last session of Congress. 1,231 women postmasters were appointed, this being nearly one-fifth of the total number of appointees.

Miss Irtense Large, 20-year-old Indian maiden, is teaching a school composed of white children in a remote settlement 50 miles north of Green River, Wyo. Her great-great-grandfather served as a guide for the Lewis and Clark expedition.

Mrs. Blanche J. Parker of Lowell, Mass., is the new president of the Woman's Auxiliary of the United Spanish War Veterans.

Johnny Hodges, aged 7, of Jersey City, owes his life to his dog "Rags", which drove off a larger dog which had attacked him.

Elizabeth Austin, 12-year-old daughter of Mrs. Anne Austin, a brilliant newspaper woman of New York, is one of the remarkable child prodigies of this generation. Little Elizabeth has an intelligent quotient of 214, a world's record, and she will enter college this fall.

Hugo Marchetti, a young violinist of Frontenac, Kan., 14 years old, refuses to imitate the girls by wearing a boyish bob, so he has let his hair grow almost to his waist.

Moses Finkelstein, 14, is a senior at Syracuse University, in addition to which he is taking a course in advanced psychology at Columbia University.

Captain Jarino and Captain Lokis of Athens, Greece, fought a duel with revolvers in a dark room, each firing three shots, but neither was hit.

NOTICE OF INTENTION

TO PURCHASE REAL ESTATE BY BOARD OF SUPERVISORS

BOARD OF SUPERVISORS, COUNTY OF SAN MATEO, CALIFORNIA.

NOTICE IS HEREBY GIVEN that the Board of Supervisors of the County of San Mateo, State of California, intend to purchase certain real estate property described as:

Lot 8, Block 21, City Extension Homestead Association, as the same appears on that certain map filed in June, 1870, in Book "D" of Maps at page 44.

The price to be paid for said property is the sum of Fifteen Hundred Dollars, ($1,500.00).

The purchase is to be made from Feliz Bortis of Colma.

Said board will meet to consummate said purchase on the 11th day of October, 1926, at the hour of ten o'clock A. M. in the Chambers of said Board in the Court House at Redwood City, California.

By order of said board.

(SEAL) ELIZABETH M. KNEESE, Clerk, San Mateo County, and ex-officio Clerk of said Board of Supervisors of said County.

SUMMONS IN ACTION TO ESTABLISH TITLE

Action No. 12186

In the Superior Court of the State of California, in and for the County of San Mateo.

J. P. Bonds, Plaintiff, vs. All Persons claiming any interest in or lien upon the real property herein described, or any part thereof, Defendants.

The People of the State of California:

To all persons claiming any interest in, or lien upon, the real property herein described or any part thereof, defendants, greeting:

You are hereby required to appear and answer the complaint of J. P. Bonds, plaintiff, filed with the Clerk of the above entitled Court and County, within three months after the first publication of this summons, and to set forth what interest, or lien, if any, you have in or upon that certain real property or any part thereof, situate in the County of San Mateo, State of California, particularly described as follows:

PARCEL ONE.

Lot 34 in Block 26, as designated on the Map entitled "Map No. 1 of the Lands of the Union Park Land Company," which Map was filed in the office of the Recorder of the County of San Mateo, State of California, on February 16, 1892, in Volume "D" of Maps at page 2, and a copy thereof entered in Volume 2 of Maps, at page 50.

PARCEL TWO.

Lot 26 in Block 26 as designated on the Map above referred to.

PARCEL THREE.

Lot 9 in Block 39 as designated on the Map above referred to.

And you are hereby notified that, unless you so appear and answer, the plaintiff will apply to the Court for the relief demanded in the complaint, to-wit: That it be adjudged that the plaintiff is the owner of said property in fee simple absolute; that his title to said property be established and quieted; that the Court ascertain and determine all estates, rights, titles, interests and claims in and to said property, and every part thereof whether the same be legal or equitable, present or future, vested or contingent, and whether the same consists of mortgages or liens of any description; that plaintiff recover his costs herein and have such other and further relief as may be meet in the premises.

WITNESS my hand and the seal of this Court.

Dated July 27, 1926.

(SEAL.)

ELIZABETH M. KNEESE, Clerk.

By G. R. Winter, Deputy Clerk.

W. H. Clay, Attorney for Plaintiff.

MEMORANDUM

The first publication of this summons was made in the Daly City Record newspaper on the 30th day of July, A. D. 1926.

The following persons are said to claim an interest in, or lien upon, said property adverse to plaintiff:

J. H. Dennis, Colma, California.

Daniel R. Carroll, San Francisco, California, and Mary Doyle, San Francisco, California, as the heirs and devisees of the Estate of Annie Carroll, deceased.

J. H. Rosseter, San Francisco, California, Joseph H. O'Brien, San Francisco, California, and John Halton, Salt Lake City, Utah, as Trustees for the stockholders of the Union Coursing Park Association, a defunct corporation.

First publication July 30, 1926.
Last publication October 1, 1926.

SUMMONS

No. 11968.

In the Superior Court of the State of California, in and for the County of San Mateo.

Action brought in the Superior Court of the State of California, in and for the County of San Mateo; and the complaint filed in said County of San Mateo in the office of the Clerk of said Superior Court.

WILHELM E. COOPER, Plaintiff, vs. MELAINE COOPER, Defendant.

The People of the State of California send Greetings to MELAINE COOPER, Defendant.

You are hereby required to appear in an action brought against you by the above named plaintiff, in the Superior Court of the State of California, in and for the County of San Mateo, and answer the complaint filed therein within ten days (exclusive of the day of service) after the service on you of this Summons, if served within said county, if served elsewhere within thirty days.

And you are hereby notified that if you fail to so appear and answer, the plaintiff will take judgment for any money or damages demanded in the complaint as arising upon contract, or will apply to the Court for any other relief demanded in the complaint.

Witness my hand and the Seal of the Superior Court of the State of California, in and for the County of San Mateo, this 13th day of May, A. D. 1926.

(SEAL.)

ELIZABETH M. KNEESE, Clerk.

By C. R. Winter, Deputy Clerk.

Frank J. Golden and Joseph M. Trusty, Hobart Building, San Francisco, Attorneys for Plaintiff.

First publication August 6, 1926.
Last publication October 8, 1926.

Diagram of the Selective Five-Tube Receiver Described in This Article. The Apparatus Indicated in Dotted Line Is Optional.

By FRANK W. HARTH,
In the New York Herald-Tribune.

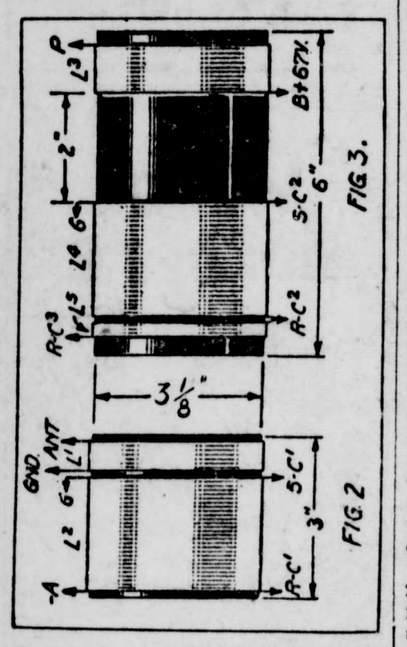
There is nothing particularly new in this circuit, which is the old Weagant, with a few variations. The set originally was designed for local reception only, but one local did not come in very well, so a stage of radio-frequency was added. A location in the center of Manhattan was selected for a test.

The set is fairly compact, the panel being 7 by 21 inches and the baseboard 12 by 20 inches.

The chief claim of novelty is the placing of the R. F., secondary, and regenerative coils on one form and having them all of the same diameter. That simplifies the work somewhat.

There are five tubes, a R. F. amplifier, a detector and three audio amplifiers. The author selected the type of audio amplifier used because the transformer gives a strong initial input, free from distortion, for the two resistance-coupled stages to amplify. The result is a signal of surprising fidelity and somewhat greater volume than a two-stage transformer-coupled amplifier.

The coils are of the ribbed type of hard rubber tubing, recommended for its high electrical efficiency. There are 12 ribs running lengthwise of the tube and spaced equally around the circumference. The turns of wire, touching only the tops of the ribs, leave a space under the coils and provide practically an air core. The antenna coil was wound (as shown in Fig. 2) with No. 22 D. C. C. wire, 15 turns for the primary coil (L1) and 46



Constructional Data on Antenna and Radio-Frequency Coil of Receiver.

turns for the secondary (L2). The number of turns for this coil may vary, depending upon the length and type of aerial used. The aerial used with this set was about 75 feet in length. If a shorter aerial is used, 50 to 54 turns may be required. The spacing between the primary and secondary is not critical; from one-eighth-inch to one-quarter-inch works.

Construction of Coils.

The coil form shown in the drawing (Fig. 3) performs a threefold duty—that of supporting the R. F. primary, the R. F. secondary and the regenerative coil. The R. F. primary coil is composed of 20 turns of No. 22 D. C. C., the R. F. secondary coil (L4) of 46 turns of No. 22 D. C. C., and the regenerative coil (L5) of 12 turns of No. 30 D. C. C. The spacing between the R. F. primary and the R. F. secondary must be two inches, or slightly more may prove even better. The regenerative coil (L5) is spaced about one-eighth inch from the secondary.

To obtain a variable condenser of .0002 capacity for the regenerator a larger condenser can be used by removing a number of the rotor plates. In this case a .00035 was used, after removing four rotor plates, which brought the capacity down to approximately .0002 mfd.

The inductance forms can be fastened directly to the baseboard with a wood screw or elevated a half inch or so on S-shaped strips of brass. One end of the S is then bolted to the form and the other end screwed to the baseboard.

For best results a good audio transformer should be used, one of not too high a ratio. One of the modern large-sized transformers should give ideal results. The resistance couplers should, of course, be of the highest grade to balance the audio transformer. A little pains taken to obtain the right resistance values is really worth while, as the builder will be amply repaid by the results obtained.

Only two vernier dials are required, as the regenerative condenser is not critical. Three dials of the same design make a better-looking panel.

The R. F. tube may or may not require a negative bias, depending, of course, on the characteristics of the particular tube. From one and one-half to three volts usually will make the tube function properly. To include a "C" battery at this point, remove the lead X—XI, as shown in Fig. 1.

The set is easy to tune, as there are only two major controls, antenna dial and wave-length dial. After the detector tube is properly adjusted the setting of the rheostat can remain permanent and the volume of the output signal controlled entirely by the R. F. tube rheostat. If the coils are properly balanced the dials should read alike and then can be successfully logged. When tuning the set the dials should be rotated slowly, a degree at a time, as the stations simply drift in and out without the usual whine or whistle. If the regenerative unit is correct, over-regeneration is indicated by signal becoming mushy when too much capacity is used—that is, when the dial is advanced too far. If the set has a tendency to "plop," remove two or more turns from the secondary side of the regenerative coil as a means of correcting the fault. Another method is to move the regenerative coil from one-quarter inch to three-eighths inch away from the secondary coil.

The value of the "C" battery used in the audio circuit may be anything from four and a half volts to nine volts or more if ninety or more volts of "B" battery are used. Most audio amplifiers work better with a "C" battery, and the saving of "B" battery is considerable in the long run.

Wave-Length Range.

The set should ordinarily tune from 200 to 526 meters smoothly and with equal volume. However, the author found one set in several he built that was for some reason or other a little tricky on wave lengths under 300 meters—that is, it had a tendency to spill over and was difficult to balance. This tendency was corrected by making use of the Rice system of neutralization. This consists of an inductance and a neutralizing condenser. These parts are indicated in the drawing to show their location, but need only be used if difficulty is experienced on the low wave lengths. There is, however, only one chance in a hundred of their being required. The coil is composed of the same number of turns as the R. F. coil and is wound directly over the R. F. coil.

The tube in the last stage can be a 201-A if the horn type of loud speaker is used. However, if the builder intends to use a cone-type speaker, he will require a greater output voltage properly to vibrate the cone. The use of a UX171 power is suggested here as a suitable means of providing the necessary power without distorting the signal. An amperite or similar filament control device of one-half ampere capacity must be provided for this type of tube.

The choke and large condenser shown in the diagram can be used or not as the builder sees fit. With their use the output signal will be much smoother, as the heavy direct current is by-passed through the choke instead of being allowed to pass through the speaker coil.

Parts Required.

The following is a list of parts actually used, but there is no reason why the set would not work well if other equally suitable parts of good quality were substituted:

One cabinet, 21 inches long and 12 inches deep.

One baseboard, 7 by 20-inch wood.

Brass strip, ½ by 1-16. See text.

One Radion panel, 7 by 3-16 inches.

Two variable condensers, .0005, General Instrument.

One variable condenser, .0002, General Instrument.

Five 201-A tubes.

Two rheostats.

Two Radion sockets.

Three sockets, gang, bakelite.

Two tubular forms, 3 by 6 inches and 3 by 3 inches Radion hard rubber.

One grid leak, variable.

One grid condenser, .00025.

Three amperites and mountings, 1-A V.

One audio transformer.

Two resisto couplers.

Four resistances, .05, .25, .1 and 2.0.

Two coupling condensers, .006.

Twelve binding posts.

Terminal strip, 1½ by 4 by 3-16 inches.

Terminal strip 1½ by 8 by 3-16 inches.

Three dials.

One filament switch.

One pound No. 22 D. C. C.

One-eighth pound No. 30 D. C. C.

Necessary screws, wire for connections, etc.

KEEP AUTO FIT WHILE ON TOUR

Proper Time to Take Needed Precautions Is Before the Start.

With every indication that motor touring, and particularly long-distance touring, will exceed all previous records in volume this year, the American Automobile association sounds a note of warning about the importance of keeping the car fit while en tour.

The time to take precautions is before the tour starts, the American Automobile association warns, pointing out that otherwise the motorist is liable to let himself in for hurried repairs and incidental delays, which are liable to mar the tour.

Preparatory Precautions.

This warning is expanded upon in a bulletin issued by the mechanical first-aid department of the Chicago Motor club, which stresses the necessity for three preparatory precautions—a thorough cleansing of the water circulation system, the assurance that the brakes are in perfect order, and the marshaling of good rubber. But these were only the high spots; the bulletin lists half a score of other suggestions, based on the experience of thousands of emergency road service calls.

The tires should be either new or in first-class condition, all cuts and abrasions having been filled with cement, and a reliable gauge to keep the pressure at a proper level should be tucked in a side pocket. A daily five-minute inspection will prove well worth while and perhaps prevent a disastrous breakdown.

"Upon the lubrication will depend at least 80 per cent of the car's service. The motorist should determine definitely that the oil particularly suited to his car may be obtained en route, or he should take enough with him to last until his return. The same applies somewhat to gasoline. One should always insist on a reliable, dependable brand. To insure continued, efficient operation it is necessary to go over the grease cups and other points of lubrication before starting each day's trip.

"The wise tourist carries at least two new spare tires complete with at least two spare tubes in waterproof and dustproof bags."

Contents of Tool Kit.

A comprehensive tool kit and complete set of chains to prevent skidding and to help extricate the car from mud holes also are essential. The tool kit, it is suggested, might include a large monkey wrench, a small monkey wrench, two sizes of screw drivers, a set of socket wrenches, a set of open-end wrenches, a pipe wrench, a machinist's hammer, a set of punches, cold and cape chisels, two sizes of files, a pair of pliers, a knife, and possibly a small vise. A good jack, preferably of the long-handled variety, a powerful hand pump if the car is not equipped with a power pump, a lug wrench and a small block of wood to go under the jack in soft ground, also are a part of the equipment.

The motorist is also advised to carry a tow rope, which it is pointed out, is "one of those things one may never have to use, but which prove indispensable if the emergency should happen to arise."

"The new gasoline strainer and an air cleaner will increase the efficiency of the car, and some sort of light to illuminate the right-hand ditch at night when passing other cars is also desirable. An extra roll of wire and electric light bulbs will not be amiss, and, if there is room for it, a bottle of distilled water for the battery will eliminate frequent stops to give the battery a drink."

Improper Tire Inflation Is Prevented by a Valve

To insure the proper inflation of motor-car tires at all times, a North Dakota inventor has developed a pressure-indicating and controlling air valve which is capable of being employed in several ways. Primarily, however, the instrument is supposed to be attached permanently to the valve of each of the four tires of a machine and connected by means of wires to an electric annunciator installed on the dash. It is 1¾ inches in height, 1⅛ inches wide, and adjustable so that it is suitable for pneumatics of various sizes and capacities. When a tire equipped with the valve is being filled, it is pumped only to the pressure recommended by its manufacturer, for when this is reached the adjusted valve automatically closes, releasing the further flow coming through the supply tube. At the same time an electric contact is made which trips a leaf on the annunciator, indicating that a specific tire has been adequately inflated. When it is not wished to equip a car with a complete set of the valves, one of them may be used as a pocket gauge. Likewise the device can be attached to the supply tube at a filling station and similarly used.—Popular Mechanics Monthly.

The Valve Is Electrically Connected With an Annunciator on the Dash Which Informs a Motorist When the Proper Amount of Air Has Been Delivered to a Tire.

Automobiles Will Skid When Tire Rubber Is Wet

Did you ever place dependance on your rubber heels when walking along a rain-swept sidewalk only to be shocked and perhaps bumped by their inability to grip the cement? That proves that rubber must be dry to cling. Once rubber has become wet it is much more slippery than oily metal.

This simple little fact should mean much to motorists, for by it we see that it isn't wet pavements, but wet rubber tires, that skid automobiles. Steel tires wouldn't skid, because neither wet steel nor wet concrete is slippery. But automobiles skid in rainy weather because wet rubber is slippery.

All of which points to the necessity of nonskid chains whenever the tires are damp or wet. Only the presence of steel cross links will effectually stop skidding. And if all accidents from skidding should suddenly and completely be eliminated, motor fatalities and injuries would be reduced nearly one-third. Such is the effect of slippery wet rubber—and the importance of nonskid chains.

Tires in Hot Weather

Many motorists still believe that in hot weather the air in a tire expands to the danger point. It is true, of course, that on a warm day the air does expand, but so slightly that its effect is negligible. The practice of running tires at less than the recommended pressure instead of effecting a saving has cost motorists thousands of dollars, for internal tire heat results not from the temperature of the outside air but from constant bending of the tire as it rolls along the road.

TEST RESISTANCE OF A STEEL GARAGE

The bureau of standards of the Department of Agriculture at Washington deliberately burned two automobiles to a mass of wreckage, as shown in the illustration. The fire, which registered a temperature of 1,350 Fahrenheit, was designed to test the resistance of a steel garage to flames. The garage remained intact and apparently was not affected by the consuming fire.

GIRLS OF SCHOOL AGE LEARN VALUABLE LESSON

Find Lydia E. Pinkham's Vegetable Compound a Dependable Medicine

LOUISE LOUTHAN
ROUTE 2, CHARLESTON, ILLINOIS

From the days of the polonaise to the days of the radio, mothers have given this dependable medicine to their daughters. School girls are often careless. They get wet feet. They overstudy or they tire themselves with too many dances and parties. They get run down.

Many an active girl of today, like the demure maiden of the 1870's, has found that Lydia E. Pinkham's Vegetable Compound is helping her to find better health and energy.

"I gave my fifteen-year-old girl Lydia E. Pinkham's Vegetable Compound, and it did her a wonderful lot of good. She had been out of school for four months. I read the advertisements of the Vegetable Compound and since she has taken it she has improved and has gone back to school again. I recommend the Vegetable Compound to other mothers with girls who are not as strong as they should be."—Mrs. Alice Louthan, Route 2, Charleston, Illinois.

"My daughter was out of school two terms. I have known about Lydia E. Pinkham's Vegetable Compound all my life and finally decided that she should try it. Three bottles helped her in various ways for the next couple of years."—Mrs. W. E. Gillette, 986 E. 52nd Place, Los Angeles, Calif.

"I have always been sickly, and until I was fourteen my father was very strict about my perfect attendance at grammar school. I have gone to school through hard storms and often taken cold. When I was fourteen I took to my bed and did not get up for eighteen months. Everyone thought I could not live. Just four months ago I began taking your wonderful medicine, Lydia E. Pinkham's Vegetable Compound, and I could notice a great change almost at once. Now I feel like a new person. I wish all girls would try Lydia E. Pinkham's wonderful medicine."—Mrs. C. M. Smith, Union Village, Vermont.

By Weight

"She has got a lot of personality, hasn't she?"

"Well, she weighs over two hundred."

Claims Everyone Can Now Have Good Health

Los Angeles Business Man Suffering Months From Constipation, Indigestion and Run-Down Condition Regains Health with Tanlac

Mr. Harry Franklin, a well-known Los Angeles manufacturer with offices at 918 Broadway, says: "My experience proves that nearly everyone can now have good health. After many months of indigestion and constipation, months that ended by my being in a badly run-down condition, I regained good health, new strength and calm nerves . . . Thanks to Tanlac.

"Imagine not being able to eat without suffering from tormenting pains and the burning sensation of indigestion. The poisons caused by sluggish liver and constipation ravaging my system, left me tired and draggy all the time, with no energy for my work.

"Then I turned to Tanlac, determined to give it a fair trial. From the first bottle it helped me. Within a few weeks I found myself with more energy than I had known in months, a fine appetite, good digestion—I feel that I could eat nails without harm—I am so built up in every way.

"I now enjoy robust health and work all day at top speed without tiring. But I have not stopped taking Tanlac, for it is the one way to continued good health, to top strength and energy. My wife, too, highly praises Tanlac. She is inclined to be delicate and has found that Tanlac has preserved her health and strength for many years. Everyone should take this wonderful tonic."

Tanlac has helped thousands of Californians. It is Nature's own remedy made from roots, barks and herbs according to the famous Tanlac formula. The first bottle usually brings wonderful relief from pain. Keep up the treatment and you grow stronger, healthier, more robust.

Don't neglect your health, don't suffer from pain needlessly, begin taking this wonder tonic now. Ask your druggist for Tanlac—today!

To be both popular and respectable at the same time is about as far as any man can go.

Think twice as much as you study, and you will have the proportions about right.

'AT OF UTMOST SMARTNESS; HANDSOME AFTERNOON FROCKS

YOU are planning on making your at of last season serve for the ng autumn and winter you are y due for a disappointment. That you aspire to be up-to-the-minute yle. According to the newly ar- g fashions a radical change is g place throughout all costuming. le styling, such as we have been ying these several seasons past, ving way to greater elaboration. only does this apply to creative gn but to fabrics as well, which choicely elegant and unique as to ve and coloring.

he coat in the picture handsome- nterprets certain new style trends.

Fashion's mood is changing. Simplicity is becoming a past word in the vocabulary of the mode. The sartorial trend is toward those elegancies and intricacies and arresting graces which go to make up the ultrafeminine type. Our afternoon frocks are to be charming conceptions of beautiful color, exquisite fabric with elaborate styling and detailing, says the mode's foreword.

Snap-shotted at the Grand Prix races were these two Paris gowns here illustrated. The one to the left might well be captioned "a study in silk," for it is a masterpiece of artistry both as to color and fabric manipulation. The

MOIRE COAT WITH MONKEY FUR

ote the new wing sleeves which add stately grace to this model. A blouse ffect across the back is also one of he new notes expressed in this exlusive coat of formal styling. However, this is adroitly accomplished by ot disturbing the slim silhouette.

As before said, fabric-elegance is nother of the season's special hobies. Just now moire silk, both for resses and coats, is causing quite a ipple of excitement throughout all ashiondom. The fact that black moire s the selected medium for this winged-sleeve coat adds to its prestige as strictly the last word in coatology.

Elaborate fur trims are to prevail on dressier coats this season, which accounts for the lavish use of monkey fur on this particular model, for 'tis said in Paris that monkey fur will again be a favored trim.

One hears considerable about deep armhole effects in the new coat versions, also dolman treatments which are manifest in many of the advance showings. Collars are widely varied.

Interesting also is the fact that many of the coming coats will be either fur-lined or lined with fine woolen material.

TWO ULTRA FASHIONABLE FROCKS

material is a colorful silk print, with a unique and decorative banding on the skirt accomplished by uniting strips of silk each of which repeat a tone or tint found in the patterning of the fabric itself. This roman stripe effect is revealed at the front opening of the blouse.

Since we are to have modes of distinctly sophisticated and elegant mien, stressing a more feminine type, this means the employment of much lace. The exquisite beige lace dress, which the lady to the right in this picture is wearing, has for its foundation a self-colored crepe faille silk, the same bordered with a broad caramel-colored velvet ribbon.

Formal and feminine elegance will express itself in velvet this autumn and winter, both for the afternoon costume and the evening gown. There will be a lavish application of richly co- embroidery done not alone in flos r. chenille, but elaborated with e- heads, rhinestones, beads and t is Much of this handiwork will b fined to the sleeves, for novel are forecast to play a prom in the designing of ou omen's frocks. Mainsprings Susceptible

The mainsprings of his watch having longer refused to function early in the week, he took it to a local jeweler to whom he ventured the suggestion that a new high-grade timepiece ought to last more than a few months—it was a Christmas gift—without needing repair.

"I was surprised when the expert repair man told me more mainsprings broke during the heated season than at any other time during the year. Thunderstorms and rapid changes wreak havoc with them. It was a new one on me. We learn something every day," he confides.—Brockton Enterprise.

Likes His Old Bus

"I see the French are expected to make a coup d'etat."

"Maybe so, but the ol' flivver is good enough for me."

Decapitation Adds to Insects' Lives

At a recent session of the Academy of Science Professor Bouvier read a curious paper written by R. P. Cambouet, noted entomologist and for many years a missionary in Madagascar. The purport of the paper was to the effect that the lives of butterflies could be prolonged by cutting their heads off in such a way as to avoid a hemorrhage—an operation which, it would appear, can be performed by an expert.

Cambouet declares that he has tried the experiment successfully with eighty butterflies and that his patients —if that is the word—not only retained "all their faculties and were able to reproduce their species, but the average span of their lives in every case was prolonged by from one to two weeks."

Decapitation as a means of prolonging life! What do the many clients of Monsieur Deibler (the guillotine) think of this?—From Le Petit Parisien. (Translated for the Kansas City Star.)

Keep in Trim!

Good Elimination Is Essential to Good Health.

THE kidneys are the blood filters. If they fail to function properly there is apt to be a retention of toxic poisons in the blood. A dull, languid feeling and, sometimes, toxic backaches, headaches, and dizziness are symptoms of this condition. Further evidence of improper kidney function is often found in burning or scanty passage of secretions. Each year more and more people are learning the value of Doan's Pills, a stimulant diuretic, in this condition. Scarcely a nook or hamlet anywhere but has many enthusiastic users. Ask your neighbor.

NEWS NOTES OF PERSONAL INTEREST

By MARC WORST

Bert Lasswell stayed at Monte Bello with friends over the week end.

Mr. J. Carins opened up his new grocery store Saturday in the Ryan's Hall building.

Mrs. M. White has added a garage to her home and is quite proud of this new improvement.

After a brief illness Arthur Young of Hanover st. has left for Capitola By the Sea to recuperate.

Mr. and Mrs. Webster of Lakeview avenue left last week to visit friends in Los Angelus and San Diego.

Mr. and Mrs. R. Owen and family are moving from South San Francisco to their new home on San Diego ave.

Marshal Doyle has been conducting a raid for the past week on speeders and has nabbed a number of buse .

Mr. Fahey, our prominent realtor of Fahey and Rich, is erecting a two story apartment house on Hillcrest Drive.

Mr. and Mrs. Emerson Barr and son Gerald of Oakland visited Mrs. Barr's mother, Mrs. M. White, over the week-end.

Young Joe Compagno of Los Banos ave., who has been missing was located in San Mateo and is now home safe and sound.

A. J. Bodien attended the meeting of the Associated Aerie of Eagles of San Mateo County Tuesday evening in South San Francisc .

Mrs. F. Marina of Vista Grande ave,returned last week from Boston where she has been spending two months with her mother.

Charles Parker of 369 Vista Grande ave. returned home Wednesday from the Orient and will leave again for there as first radio operator on Saturday.

Thomas Jefferson Beeson, Jr., was the recipient of many beautiful presents last Sunday, at a jolly gathering held at the home of Mr and Mrs. Thomas J. Beeson

Mr. and Mrs. R. Wall entertained a number of friends at dinner l st Saturday evening at their new home on Bellevue ave.

Mrs. G . C. Golden returned Thursday from Bellingham, Washington and reports that her brother who she was visiting is greatly improving in his health.

Miss Muriel Hansen of San Jose avenue was given a very delightful birthday party by her girl friends last Tuesday evening. She received many beautiful gifts.

George Young and James Ellie of Daly City spent last week end on a fishing and hunting trip returning home with a good catch.

Mrs. M. Ratto and mother Mrs. Crawford write that they have arrived in Hot Springs New Mexico where they will remain for a month Mrs. Crawford is greatly improved.

A surprise party was held at the home of Mrs Blackhall on Evergreen avenue. The evening was spent in card playing and dancing, at the close a very delightful supper was served.

The Woodrow Wilson Vista Grande P, T. A. Choral is doing splendid work meeting every Tuesday evening at the home of Mrs. D. T. Bently, the well known choral and vocal teacher.

Mr. E. Sebring who was for sometime connected with the Record Staff paid a visit this week and was greatly impressed with the amount of new buildings that have been erected in the last few years.

Mrs. M. White and Mrs C. Scott motored to Hickman, San Joaquin County and from there to Farmington Thursday and Friday at Hickman they visited Mr. Bria and at Farmington Mr. and Mrs. Trombetta, all formerly of Daly City

Mrs. M. D. O'Kane, residing at 260 Irvington street has composed quite a number of beautiful songs and she expects to have them in the publishers hands in the very near future.

DALY CITY, COLMA N. D. G. W. WIN PARADE PRIZE

Members of the El Carmelo Parlor No. 181, Native Daughters of the Golden West of Colma and Daly City, are jubilant today over their victory in Sacramento on Admission Day. The parlor's drill team was awarded the cup for the best patrol.

The drill team consists of twenty prominent misses of Colma and Daly City and it has the reputation of being the only drill team commanded by a girl major. The major and drill master of the patrol is Miss Laura Figoni, one of the most popular young ladies of the community.

The girls appeared for the first time in their new uniforms, consisting of red coats, white trousers and West point caps.

GRACE PRESBYTERIAN CHURCH

Pastor will use for his theme SOLD AGAIN Or the spirit of the age.

You will enjoy a happy Sunday night with us I am sure.The spirit of the meeting last Sabbath evening was the best for many weeks, the orchestra was fine and the singing was a real uplift and the people took hold with such an holy zeal that it really made the hearts of all rejoice. After all the church service is folly if it does not touch the heart and intellect and emotions so as to inspire and strengthen for the duties of tomorrow The rally day program is coming along in fine shape and the people are having more of a mind to work, as one family, not members of the church, went out and got flowers of their neighbor and brought them for the service at the church, and if any have flowers we will appreciate very much if you will bring some to brighten tl.e place of prayer.

The dining room of the church has been newly papered during the week and a coat of tinting put on the ceiling and presents a very nice appearance and the primary scholars enjoy meeting in this room. Thanks to Mr.e Lewis for the tinting.

The Ladies of the Guild met in their regular sewing circle on Wednesday afternoon of this week. The Boys club met with the Pastor on Thursday afternoon and are planning the work of the fall.

Mr Bonham is leading the orchestra and we are meeting for a short practice on Wednesday evening at 7,p.m. and we invite any and all who play instruments to come and receive the benefit of this practice, special music is being prepared for this Sabbath evening. The C. E. is starting very fine and Miss Hester Blaylock will lead the meeting at 7. p. m. next Sabbath evening, come and help her..

Chas. H. Gatchell Minister,
Phone Delaware 1544.

FACTS ABOUT THE TELEPHONE

Virginia has about the same population as Lithunia, but the Old Dominion boasts twenty-six times as many telephones as this Baltic state.

Glasgow, Scotland and Detroit, Michigan, are about the same size, but the motor metropolis has four times as many telephones as the Scotch port.

If the entire world were proportionately as well served from a telephone standpoint as the continent of North America, it would have eight times as many telephones as at present.

A long distance domino match by telephone, believed the first to be handled in this way, was played recently between the Los Angeles Athletic Club and the Commercial Club of San Francisco. Each organization was represented by three of its best players.

The telephone industry in the United States (including both the operation of the telephone systems and the manufacture of telephone equipment) employs over 400,000 persons, or one out of every 280 of the entire population of the country.

SAVES MILLIONS OF BACKACHES

In the course of a year the average electric cleaner collects fifteen bushels of dirt and dust. As there are 4,500,000 of these cleaners inuse in the United States their annual harvest runs to 60,000,000 bushels of dirt which would otherwise have been gathered by broom and dustpan at the cost of many a backache.

ABOUT WOMEN

Mrs Sarah Cory Menezes, assistant United States district attorney at Fort Worth, Tex., has handled 57 cases, out of which she secured 51 convictions. Four cases were continued, one resulted in a hung jury and there was only one acquitttal.

Princess Alexandrine Cantacuzene of Rumania is Europe's leading clubwoman, being president of more organizations than any other woman on the continent.
